| 11. Central New Mexico Electric Cooperative | \$0.132000 | \$69.17 |
| 12. Southwestern Electric Cooperative | \$0.160000 | \$83.84 |

* The Cooperative does not use Tri-State G&T as its wholesale power provider and may have a different wholesale power cost than the other New Mexico RECs.

Those numbered 1 through 12 are the New Mexico Cooperatives that buy wholesale power through

Tri-State and will be affected by the Tri-State rate increase. They all have the same wholesale power cost. The difference in the retail rate partly reflects cost of operations and can reflect higher cost due to waste or inefficiency.
