Message from Carol Pittman:

The battle goes on ... and on ... and on ...

Why? Well, the Augustin Plains Ranch thinks we will quit and go away. If we do, they win.

Bruce Frederick, attorney defending us in battle, has won the first two rounds for us: two applications submitted to the Office of the State Engineer have been rejected.

Now there's a third application.

The State Engineer has the application, but is not publishing it as he must do before it can be acted upon. He can sit on it indefinitely (and maybe hope we'll go away?) and until it is noticed in local papers we cannot take any action. So here's what we have to do: 1) watch the local papers for an announcement of the new application and 2) protest at that time.

Meanwhile, don't give up. We can win if we hang in and work together. So far that's what has happened; you have all been great through seven years of protests, court cases and games playing by the APR LLC.
